

# COMP501 | ASSIGNMENT 3 | GROUP 1307

## Technology for seniors

### Reasons:

- Struggle for the older generations to integrate modern technology into their lives
- Difficulty on basic understanding on how to use devices
- How more "advanced" technology is supposed to inhibit potential problems addressed by senior citizens

We will all work as a team and assist each other with all aspects of this assessment including research, content and creation of this assignment.

We have set up effective ways of communication and automatic resource and code file sharing to ensure we all have access, at any time so we can all work and support each other.
